

Logan Barajas

SOFTWARE ENGINEER STUDENT

Experience

UNIVERSITY OF CALIFORNIA, IRVINE

Full Stack Coding Bootcamp, graduating February 3rd, 2022

- Lead a team to develop a project that incorporated our current understanding of technologies used.
- Utilized User friendly interfaces and design to capture an audience.
- Worked with industry leading technologies such as ReactJS, Node JS, Express, Heroku, Mongoose, Bootstrap and SQL
- Relevant projects that Challenge and Relate to Software Engineering roles in the workforce

GOOGLE CSSI

CSUSM - Summer 2019

- Participated in a sponsored summer program taught and led by Google on the CSUSM campus
- worked in teams to develop an app using HTML / CSS, Python, and Amazon AWS and presented it to Software Engineers at Google

Education History

CALIFORNIA STATE UNIVERSITY, SAN MARCOS

Bachelor of Science, Software Engineering, Expected in December 2022

- Currently a full time Software Engineering Student interested in front end engineering and iOS development.

A student leader in multiple on campus clubs such as

- Google's DSC Developer program
- CSUSM CS Club
- CSUSM IEEE (Institute of Electrical and Electronics Engineers)

Relevant Coursework

- Computer Science I (cs 111)
- Computer Science II (cs 211)
- Assembly Language and Digital Circuits (cs 231)
- Data Structures and Algorithms (cs 311)
- Programming Languages (cs 351)
- Calculus I (Math 160)
- Calculus II (Math 162)
- Discrete Math (Math 270)
- Statistics (Math 242)
- Physics I (Phys 101)
- Physics II (Phys 102)

Personal Profile

- I am a college student with a passion for front end development, design, user friendly interfaces, and iOS development.
- Active participant and friendly communicator with fellow team members.
- Committed to healing the planet and introducing eco friendly technology to the world.

Skills

Programming languages

- HTML/CSS
- JavaScript
- Java
- C++
- Python
- MySQL
- MongoDB

Libraries

- jQuery
- React
- Node.js
- Express
- Mongoose

Platforms

- [Git](#)
- [Compass](#)
- [SQL workbench](#)

Projects

- 4UWorkout
 - Web app built with metro4, HTML, JavaScript, and CSS that utilizes two APIs to fetch live data from an exercise and a music database. In conjunction, they work together to generate a perfect workout and music playlist
- Learn-n-Earn (uikit, Mongoose, Heroku, JS)
 - A interactive web application that deploys the role of a middle ground between College Students and Employers. Results display available job postings from registered employers and allow for students to interact and respond live.
